

TABLE OF CONTENTS – The Living Planet : The State of the World's Wildlife

- **The Living Planet Front Cover**
- **The Living Planet - Title page**
- **Copyright page**
- **Contents**
- **Contributors**
- **Preface**
- **Acknowledgements**
- **One - Introduction and the Evolution of Life on Earth**
- **Two - Flowering Plants**
- **Three - Bryophytes and Pteridophytes: Spore-Bearing Land Plants**
- **Four - Terrestrial Mammals**
- **Five - Marine Mammals: Exploited for Millennia, But Still Holding On**
- **Six - How Birds Reveal the Scale of the Biodiversity Crisis**
- **Seven – Reptiles**
- **Eight – Amphibians**
- **Nine - Freshwater Fishes: Threatened Species and Threatened Waters on a Global Scale**
- **Ten - The Amazing Yet Threatened World of Marine Fishes**
- **Eleven - Insects**
- **Twelve - Marine Invertebrates**
- **Thirteen - Non-Insect Terrestrial Arthropods**
- **Fourteen - Terrestrial Invertebrates Other Than Arthropods and Molluscs**

- **Fifteen - Non-Marine Molluscs**
- **Sixteen - An Account of the Diversity and Conservation of Fungi and Their Close Relatives**
- **Seventeen - Simple Life Forms**
- **Eighteen - Assessing Species Conservation Status: The IUCN Red List and Green Status of Species**
- **Nineteen - Problems with the World's Ecosystems: The Future and Attempts to Mitigate Decline**
- **Twenty - Conservation Methods and Successes**
- **Twenty One - What Does the Future Hold for Our Planet and its Wildlife?**
- **Species Index**
- **Subject Index.**
