

TABLE OF CONTENTS

<i>List of Figures</i>	ix
<i>List of Tables</i>	xxi
<i>Preface</i>	xxiii
Chapter 1 Introduction.....	1
Chapter 2 Review of Genetics and Its Significance to Veterinary Medicine	5
2.1 Deoxyribonucleic Acid (DNA): The Genetic Material.....	6
2.2 Central Dogma of Molecular Biology.....	10
2.3 Mutations in the Genetic Message	14
2.4 Chromosomes as Genetic Elements	15
2.5 Cell Division and its Genetic Implications	17
2.6 Significance of Genetics in Veterinary Medicine	21
Reference	23
Chapter 3 Genetics and Disease	25
3.1 The Genetic Basis of Disease In Animals	26
3.2 Genetic Tools to Diagnose Genetic Disorders	40
3.3 Genetic Tools to Treat Genetic Disorders.....	52
References	64
Chapter 4 Genetics and Immunity	69
4.1 Major Defense Barriers	71
4.2 Understanding the Immunogenetics of Leprosy Using Animal Models.....	95
4.3 Animal Models for HIV Infection or AIDS	102
References	110

Chapter 5	Sequencing The Genome of Domestic Animals.....	115
5.1	Sequencing Technologies	116
5.2	Analyzing Genomic Data.....	124
5.3	Significance of Sequencing Domestic Animal Genomes	127
5.4	Sequencing the Genome of Domestic Animals	129
References		146
Chapter 6	Veterinary Pharmacogenetics and Pharmacogenomics	147
6.1	Significance of Pharmacogenomics.....	148
6.2	Data Generation and Analysis in Pharmacogenomics	150
6.3	Animal Models of Pharmacogenomics	157
6.4	Limitations of Animal Models	165
References		167
Chapter 7	Veterinary Nutrigenomics	169
7.1	Diet and Gene Expression.....	170
References		178
Chapter 8	Veterinary Epigenetics.....	179
8.1	Epigenetic Mechanisms	180
8.2	Animal Models in Epigenetics.....	189
8.3	Epigenetics in Cloned Animals.....	191
8.4	Epigenome and The Environment.....	194
8.5	Epigenetics and Animal Behavior.....	197
8.6	Epigenetics and Immunity.....	200
8.7	Epigenetics and Cancer.....	200
References		203
	Index.....	205
