

TABLE OF CONTENTS

Principles of Animal Behavior, 4th Edition

Preface

1 Principles of Animal Behavior

Types of Questions and Levels of Analysis

What Is Behavior?

Three Foundations

Natural Selection

Individual Learning

Cultural Transmission

Conceptual, Theoretical, and Empirical Approaches

Conceptual Approaches

Theoretical Approaches

Empirical Approaches

An Overview of What Is to Follow

Interview with Dr. E. O. Wilson

2 The Evolution of Behavior

Artificial Selection

Natural Selection

Selective Advantage of a Trait

How Natural Selection Operates

Sociobiology, Selfish Genes, and Adaptation

CONSERVATION CONNECTION: Conservation Biology and Symmetry as an Indicator of Risk

Antipredator Behavior in Guppies

Kinship and Naked Mole Rat Behavior

COGNITIVE CONNECTION: Tool Use in New Caledonian Crows

Phylogeny and the Study of Animal Behavior

Phylogenetic Trees

Phylogeny and Parental Care

Phylogeny and Courtship Behavior

Interview with Dr. Alan Grafen

3 Hormones and Neurobiology

Ultimate and Proximate Perspectives

Proximate Causation: Hormones

CONSERVATION CONNECTION: Community-Based Ecotourism: Using Hormones to Measure Effects on Animal Well-Being

How the Endocrine System Integrates Sensory Input and Output

The Long-Term Effects of In Utero Exposure to Hormones

Vasopressin and Sociality in Voles

Hormones and Honeybee Foraging

Hormones and Vocalizations in Plainfin Midshipman Fish

Neurobiological Underpinnings of Behavior
The Nervous Impulse
Mushroom Bodies and Honeybee Foraging
COGNITIVE CONNECTION: Brain Size and Problem Solving
Neurobiology and Vocalizations in Plainfin Midshipman Fish
Sleep and Predation in Mallard Ducks
Interview with Dr. Geoffrey Hill

4 Molecular Genetics and Development

Molecular Genetics and Animal Behavior
Mendel's Laws
Locating Genes for Polygenic Traits
Genes, mRNA, and Honeybee Foraging
Song Acquisition in Birds
COGNITIVE CONNECTION: Genomic Approaches
avpr1a, Vasopressin, and Sociality in Voles
Genetic Toolkits, Transcription Factors, and Territoriality
Development and Animal Behavior
Development, Temperature, and Ovipositing Behavior in Wasps
CONSERVATION CONNECTION: Development, Dispersal, and Climate Change
Family Structure, Development, and Behavior in Prairie Voles
Early Nest Development and Behavior in Cichlid Fish
Early Development and Its Effect on Parental Behavior in the Oldfield Mouse
Interview with Dr. Gene Robinson

5 Learning

What Is Individual Learning?
How Animals Learn
Learning from a Single-Stimulus Experience
Pavlovian (Classical) Conditioning
Instrumental (Operant) Conditioning
Why Animals Learn
Within-Species Studies and the Evolution of Learning
COGNITIVE CONNECTION: Natural Selection and Associative Learning
Population Comparisons and the Evolution of Learning
A Model of the Evolution of Learning
What Animals Learn
Learning about Predators
CONSERVATION CONNECTION: Learning, Alarm Chemicals, and Reintroduction Programs
Learning about Their Mate
Learning about Familial Relationships
Learning about Aggression
Molecular Genetics and Endocrinology of Learning
Molecular Genetics of Learning in Rats
Endocrinology of Learning in Rats
Interview with Dr. Sara Shettleworth

6 Cultural Transmission

What Is Cultural Transmission?

What's So Important about Cultural Transmission?

Effects of Others on Behavior

Social Learning

CONSERVATION CONNECTION: Crop Raiding, Elephants, and Social Learning

The Rise and Fall of a Tradition

Teaching in Animals

COGNITIVE CONNECTION: Parents Teaching Embryos?

Modes of Cultural Transmission

Vertical Cultural Transmission

Oblique Cultural Transmission

Horizontal Cultural Transmission

The Interaction of Genetic and Cultural Transmission

The Grants' Finches

Guppy Mate Choice

Cultural Transmission and Brain Size

Interview with Dr. Cecilia Heyes

7 Sexual Selection

COGNITIVE CONNECTION: Aggression, Observation, and Gene Expression in the Brain of Females

Intersexual and Intrasexual Selection

Evolutionary Models of Mate Choice

CONSERVATION CONNECTION: Genetic Diversity, Genetic Quality, and Conservation Biology

Direct Benefits and Mate Choice

Good Genes and Mate Choice

Runaway Sexual Selection

Sensory Bias and the Emergence of Mate Choice

Learning and Mate Choice

Sexual Imprinting

Learning and Mate Choice in Japanese Quail

Cultural Transmission and Mate Choice

Mate-Choice Copying

Song Learning and Mate Choice in Cowbirds

Male-Male Competition and Sexual Selection

Red Deer Roars and Male-Male Competition

Male-Male Competition by Interference

Male-Male Competition by Cuckoldry

Interview with Dr. Anne Houde

8 Mating Systems

Different Mating Systems

Monogamous Mating Systems

Polygamous Mating Systems

COGNITIVE CONNECTION: The Social Brain Hypothesis

Promiscuous Mating Systems

The Ecology and Evolution of Polygynous Mating Systems

Polygyny and Resources

The Polygyny Threshold Model

CONSERVATION CONNECTION: Anthropogenic Effects on Animal Mating Systems

Extrapair Copulations
Sperm Competition
Sperm Cooperation
Multiple Mating Systems in a Single Population?
Interview with Dr. Catherine Marler

9 Kinship

Kinship and Animal Behavior
Kinship Theory
Relatedness and Inclusive Fitness
Family Dynamics
CONSERVATION CONNECTION: Nonbreeding Groups and Inclusive Fitness
Benefits in Gorillas
Conflict within Families
Parent-Offspring Conflict
Sibling Rivalry
Kin Recognition
Matching Models
COGNITIVE CONNECTION: Social Learning, Kinship, and Antipredator Behavior
Interview with Dr. Francis Ratnieks

10 Cooperation

Defining Cooperation
Paths to Cooperation
Path 1: Reciprocity
COGNITIVE CONNECTION: Empathy
Path 2: Byproduct Mutualism
Path 3: Group Selection
Coalitions
CONSERVATION CONNECTION: Cooperation, the Tragedy of the Commons, and Overharvesting
Coalitions in Baboons
Alliances and “Herding” Behavior in Cetaceans
A Phylogenetic Approach to Cooperation
Phylogeny and Cooperative Breeding in Birds
Phylogeny and Cooperation in Shrimp
Phylogeny and Cooperation in Social Spiders
Interspecific Mutualisms
Ants and Butterflies—Mutualism with Communication?
Coral and Coral Reef Fish
Interview with Dr. Hudson Kern Reeve

11 Foraging

Finding Food and the Search Image
Optimal Foraging Theory
What to Eat
Where to Eat
Risk-Sensitive Foraging
Growing Food
Foraging and Group Life

Group Size

Groups, Public Information, and Foraging

Natural Selection, Phylogeny, and Seed Caching

Hippocampal Size and Caching Ability

A Phylogenetic Approach to Studying Caching Ability

Learning and Foraging

COGNITIVE CONNECTION: Proximate Factors in Foraging-Related Learning

Foraging, Learning, and Brain Size in Birds

CONSERVATION CONNECTION: Behavioral Traditions, Foraging, and

Conservation in Killer Whales

Foraging Innovation and Diversification in *Emberizoidea*

Social Learning and Foraging

Interview with Dr. John Krebs

12 Antipredator Behavior

Avoiding Predators

Blending into the Environment

Being Quiet

Choosing Safe Habitats

CONSERVATION CONNECTION: Co-evolution, Naive Prey, and Introduction

Programs

What Prey Do When They Encounter Predators

Fleeing

COGNITIVE CONNECTION: Heritability of Conditioned Fear Responses

Approaching Predators

Feigning Death

Signaling to Predators

Fighting Back

Predation and Foraging Trade-offs

Interview with Dr. Anne Magurran

13 Communication

Communication and Honesty

Communication Solves Problems

Problem: How to Coordinate Group Foraging

Problem: How to Find and Secure a Mate

CONSERVATION CONNECTION: Anthropogenic Change and Animal

Communication

Problem: Predators

COGNITIVE CONNECTION: Can Elephants Distinguish Between Humans Based on

Voice?

Interview with Dr. Rufus Johnstone

14 Habitat Selection, Territoriality, and Migration

Habitat Choice

The Ideal Free Distribution Model and Habitat Choice

Avoidance of Disease-Filled Habitats

Stress Hormones, Spatial Memory, and Habitat Choice in Rats

Territoriality

Territoriality and Learning
COGNITIVE CONNECTION: Nest Complexity and Cerebellar Foliation
Conflict within Family Territories
Migration
Multiple Migratory Routes
Migration and Navigation
CONSERVATION CONNECTION: Migration Patterns, "Stopovers," and Conservation Biology
Migration, Temperature, and Basal Metabolic Rate
Migration and Defense against Parasites
A Phylogenetic Approach to Migratory Behavior
Interview with Dr. Judy Stamps

15 Aggression

Fight or Flight?
CONSERVATION CONNECTION: Breeding Programs Can Lead to More Aggressive Animals
Game Theory Models of Aggression
The Hawk-Dove Game
The War of Attrition Model
The Sequential Assessment Model
Winner, Loser, Bystander, and Audience Effects
Winner and Loser Effects
Bystander Effects
Audience Effects
Aggression and Social Network Theory
COGNITIVE CONNECTION: Aggression, Observation, and Gene Expression in the Brain of Males
Interview with Dr. Karen Hollis

16 Play

Defining Play
CONSERVATION CONNECTION: Play Behavior as a Measure of Environmental Stress
Types and Functions of Play
Object Play
Locomotor Play
Social Play
COGNITIVE CONNECTION: Play and Brain Development
A General Theory for the Function of Play
Endocrinological and Neurobiological Bases of Play
Play Fighting in Young Male Rodents
A Phylogenetic Approach to Play
Interview with Dr. Marc Bekoff

17 Animal Personalities

Boldness and Shyness
Bold and Shy Pumpkinseeds
Some Case Studies

Hyena Personalities
Octopus and Squid Personalities
Natural Selection and Personality in Great Tits
Coping Styles
COGNITIVE CONNECTION: Brain Size and the Proactive-Reactive Personality
Continuum
CONSERVATION CONNECTION: Using Personality to Reduce Human-Animal
Conflicts
Personality and Dispersal Behavior
Interview with Dr. Sam Gosling
