

TABLE OF CONTENTS

Clinical Radiology of the Horse, 4th Edition

About the authors

Preface to the fourth edition

1 General principles 1

Introduction, 1

Principles of radiography, 3

Principles of radiographic interpretation: radiology 15

Radiological appearance of physiological changes and some common pathological lesions, 20

2 Computed and digital radiography 41

3 The foot_55

Distal phalanx (pedal bone), 55

Hoof, 97

Navicular bone, 113

4 The proximal and middle phalanges and the proximal interphalangeal joint_149

5 Metacarpophalangeal and metatarsophalangeal (fet lock) joints_175

6 The metacarpal and metatarsal regions_215

7 The carpus and antebrachium_259

8 The shoulder, humerus, elbow and radius_301

Scapulohumeral (shoulder) joint and humerus, 301

Humeroradial, humeroulnar and radioulnar (elbow or cubital) joints and radius, 330

9 The tarsus_349

10 The stifle and tibia_399

Stifle, 399

Tibia, 440

11 The head 449

Cranium, 451

Paranasal sinuses (frontal, maxillary, conchal) and maxilla, 466

Teeth and mandible, 480; Pharynx, larynx and Eustachian tube diverticulum, 512

12 The vertebra l column 531

Cervical vertebrae, 531

Thoracolumbar vertebrae, 569

Sacrum and coccygeal vertebrae, 602

13 The pelvis and femur_609

Pelvis, 609

Femur, 632

14 The thorax 639

15 The alimentary and urinary systems_687

Oesophagus, 694; Abdomen and gastrointestinal tract, 705

Urinary system, 715

16 Miscellaneous techniques_723

Arthrography and bursography, 723

Tendonography, 724

Angiography, 725;

Venography, 730

Myelography, 733

Pneumocystography, 743

Intravenous Pyelography, 744

Other techniques, 744

Appendix A: Fusion times of physes and suture lines_749

Appendix B: Exposure guide, image quality and film processing faults_753

Appendix C: Glossary 761

Index 767.
