

# TABLE OF CONTENTS

Preface

Acknowledgements

List of contributors

## Section 1 GENERAL TOPICS AND CONDITIONS AFFECTING MULTIPLE TAXA

1 Wildlife health in Australia

2 Veterinary aspects of native mammal conservation translocations

3 Disease risk analysis for wildlife translocations

4 Wildlife rehabilitation practices in Australia

5 Assessment and management of reproduction in Australian monotremes and marsupials

6 Management of overabundant populations

7 Monotreme, marsupial and bat immunology

8 Stress physiology of Australian mammals

9 Capture, physical and chemical restraint

10 Surgery

11 Pharmacology

12 Dermatology

13 Dentistry

14 Nutrition

15 Paediatrics

16 Zoonoses

17 Antimicrobial resistance

18 Neoplasia

19 Plant and other toxicoses

20 Emerging infectious diseases

21 Toxoplasmosis

22 Mycobacteriosis

23 Marsupial herpesviruses

24 Neural angiostrongyliasis

25 Cryptococcosis

26 Haemoprotozoan parasites

## Section 2 TAXON-SPECIFIC UPDATES AND TOPICS

27 Platypus

28 Short-beaked echidna

29 Coccidiosis in short-beaked echidnas

30 Macropods

31 Macropod progressive periodontal disease ('lumpy jaw')

32 Koala

33 Koala retrovirus

34 Chlamydiosis in koalas

35 Veterinary involvement in the research and management of free-ranging koala populations

36 Wombats

37 Possums and gliders

38 Dasyurids and the numbat

39 Devil facial tumour disease  
40 Bandicoots and the greater bilby  
41 Bats  
42 Hendra virus  
43 Rodents  
44 Pinnipeds  
45 Cetaceans  
46 Dugong  
Colour plates  
Appendix 1. Clinical pathology and physiological values  
Appendix 2. Blood collection sites  
Appendix 3. Suggested chemical restraint agents, regimens and doses  
Appendix 4. Drug formulary  
Appendix 5. Dentition charts for selected Australian mammal Families  
Appendix 6. Abbreviations  
Index
