

## **TABLE OF CONTENTS**

**Infectious pancreatic necrosis and associated aquatic birnaviruses.**

**Infectious haematopoietic necrosis virus.**

**Viral haemorrhagic septicaemia.**

**Infectious salmon anaemia.**

**Viral diseases and agents of warmwater fish.**

**Salmonid alphaviruses.**

**Oncogenic viruses and *Oncorhynchus masou* virus.**

**Piscirickettsia, Francisella and epitheliocystis.**

**Bacterial kidney disease (*Renibacterium salmoninarum*).**

***Enterococcus seriolicida* and *Streptococcus* spp. (*S. iniae*, *S. agalactiae* and *S. dysgalactiae*).**

**Mycobacteriosis and nocardiosis.**

**Furunculosis and other aeromonad diseases.**

**Enteric redmouth disease (ERM) (*Yersinia ruckeri*).**

**Edwardsiella septicaemias.**

**Vibriosis.**

**Flavobacterial diseases: columnaris disease, coldwater disease and bacterial gill disease.**

**Pasteurellosis and other bacterial diseases.**

**Saprolegnia and other oomycetes.**

**Ichthyophonus.**

**Shellfish diseases (viral, bacterial and fungal).**

**Genomics of fish and shellfish microbial pathogens.**
