

Table of contents

1. Front Matter

Pages I-XVII

2. The Subject Matter and Methods of Comparative Biochemistry

- Klaus Urich

Pages 1-8

3. Nucleic Acids and Nuclear Proteins

- Klaus Urich

Pages 9-69

4. The Structural Variety and Metabolism of Proteins

- Klaus Urich

Pages 70-110

5. Molecular Evolution

- Klaus Urich

Pages 111-183

6. Plasma Proteins, Yolk Proteins and Metal-Binding Proteins

- Klaus Urich

Pages 184-219

7. Immunoproteins

- Klaus Urich

Pages 220-248

8. Respiratory Pigments

- Klaus Urich

Pages 249-287

9. Peptide Hormones

- Klaus Urich

Pages 288-318

10. Toxic Proteins and Peptides

- Klaus Urich

Pages 319-330

11. Proteins of Muscle and the Cytoskeleton

- Klaus Urich

Pages 331-375

12. Extracellular Structural and Secretory Proteins

- Klaus Urich

Pages 376-402

13. Small Nitrogenous Compounds

- Klaus Urich

Pages 403-462

14. The Structure and Metabolism of Carbohydrates

- Klaus Urich

Pages 463-513

15. Glycolysis

- Klaus Urich

Pages 514-561

16. Lipids

- Klaus Urich

Pages 562-623

17. Sterols and Steroids

- Klaus Urich

Pages 624-656

18. Ester Hydrolases, ATPases and Carboanhydrases

- Klaus Urich

Pages 657-684

19. Oxidative Metabolism

- Klaus Urich

Pages 685-715

20. Secondary Metabolites

- Klaus Urich

Pages 716-759
