

TABLE OF CONTENTS – Infectious Diseases of the Dog and Cat A Color Handbook

Respiratory Diseases.

Aelurostrongylus abstrusus/cat lungworm, verminous pneumonia. Bacterial pneumonia. *Blastomyces dermatitidis*/blastomycosis. *Bordetella bronchiseptica*. Canine adenovirus type 2. Canine infectious respiratory disease complex;. kennel cough, infectious tracheobronchitis. Canine parainfluenza virus. Canine respiratory coronavirus. Chlamydiosis/*Chlamydia* (formerly *Chlamydophila felis*). *Crenosoma vulpis* (fox lungworm). *Eucoleus aerophilus* (*Capillaria aerophila*) (lungworm). Feline calicivirus. Feline herpesvirus 1. (feline viral rhinotracheitis). Feline upper respiratory tract disease. Filarid lungworms: *Filaroides hirthi*, *Oslerus (Filaroides) osleri*. Influenza virus. *Mycoplasma* spp.. *Paragonimus kellicotti* (lung fluke). *Pneumonyssoides caninum*. Pyothorax. *Streptococcus zooepidemicus*.
References.

Gastrointestinal Diseases.

Baylisascaris procyonis. *Campylobacter*. Canine circovirus. Canine enteric coronavirus. *Clostridium difficile*. *Clostridium perfringens*. *Cryptosporidium*. *Cystoisospora*. *Echinococcus multilocularis*. Giardiasis. Granulomatous colitis. *Helicobacter* spp. (*H. pylori* and non-*H. pylori Helicobacter* spp.). *Heterobilharzia americana* (North American canine schistosomiasis). Hookworms: *Ancylostoma* and *Uncinaria* spp.. Liver flukes: *Platynosomum fastosum*, *Platynosomum concinnum*. Parasitic gastritis: *Physaloptera* spp. and *Ollulanus tricuspis*. Parvoviruses: canine parvovirus and feline panleukopenia virus. *Salmonella*. Tapeworms: *Taenia* spp. and *Dipylidium caninum*. *Toxocara* and *Toxascaris* spp. (ascarids or roundworms). *Trichuris vulpis* (canine whipworms). *Tritrichomonas foetus* colitis (trichomoniasis).
References.

Neurologic Diseases.

Bacterial meningitis or meningoencephalitis. Canine distemper virus (distemper). *Clostridium botulinum*/botulism. *Clostridium tetani*/tetanus. *Cuterebra* myiasis. Diskospondylitis. *Neospora caninum*. Pseudorabies. Rabies. Tick paralysis. West Nile virus and eastern equine encephalitis virus. References.

Genitourinary Diseases.

Bacterial cystitis. Brucellosis (*Brucella canis*). Canine transmissible venereal tumor. *Diectophyme renale* (giant kidney worm). Fungal urinary tract infection. Leptospirosis. Prostatitis. Pyelonephritis. Pyometra. References.

Skin And Soft Tissue Diseases.

Cheyletiella spp. (cheyletiellosis). *Demodex canis*. Dermatophytosis (ringworm). Lagenidiosis. Lepromatous mycobacterial infections. *Malassezia pachydermatis*. Necrotizing fasciitis. Non-tuberculous mycobacteria. Otitis externa. *Otodectes cynotis* (ear mites). Papillomavirus. Pyoderma. *Pythium insidiosum* (pythiosis). *Sarcoptes scabiei* and *Notoedres cati*. Sporotrichosis. Zygomycosis. References.

Multisystem Diseases.

Actinomyces and *Nocardia* spp.. Anaerobic bacterial infections. *Angiostrongylus vasorum* (French heartworm). *Babesia* spp. (babesiosis). *Bartonella* spp. (bartonellosis). *Coccidioides immitis* and *C. posadasii* (coccidioidomycosis, valley fever). *Coxiella burnetii* (Q fever). Cryptococcosis. *Cytauxzoon felis* (cytauxzoonosis). *Dirofilaria immitis* (heartworm). Ehrlichiosis and anaplasmosis. Environmental and opportunistic fungal pathogens. Dimorphic systemic mycoses. Filamentous ascomycetes, non-pigmented (aspergillosis). Dematiaceous (pigmented) fungi (phaeohyphomycoses). Feline immunodeficiency virus. Feline infectious peritonitis. Feline leukemia virus. Hemotropic mycoplasmas. *Hepatozoon americanum* (American canine hepatozoonosis). Histoplasmosis. *Leishmania* spp. (leishmaniosis). Listeriosis. Lyme disease (borreliosis). *Neorickettsia helminthoeca* (salmon poisoning). Plague/*Yersinia pestis*. *Prototheca* spp. (protothecosis). Rocky Mountain spotted fever/*Rickettsia rickettsii*. Surgical site infections. *Toxoplasma gondii* (toxoplasmosis). Trypanosomiasis. Tularemia (*Franciscella tularensis*). References.
