

TABLE OF CONTENTS – Smart Livestock Nutrition

Series : Smart Animal Production, Volume 2

Putting Smart into Nutrition

Matching Feed Characteristics to Animal Requirements Through Plant Breeding

Circular Feed Production and Consumption in the Context of Smart Animal Nutrition

Assessment of the Nutritive Value of Individual Feeds and Diets by Novel Technologies

Large-Scale Phenotyping and Genotyping: State of the Art and Emerging Challenges

Mathematical and Statistical Approaches to the Challenge of Forecasting Animal Performance for the Purposes of Precision Livestock Feeding

Smart Pig Nutrition in the Digital Era

Smart Poultry Nutrition

Advanced Technology in Aquaculture – Smart Feeding in Marine Fish Farms

Smart Nutrition of Extensively Kept Ruminants

The Potential Contribution of Smart Animal Nutrition in Reducing the Environmental Impacts of Livestock Systems.
