

TABLE OF CONTENTS

Canine Hepatobiliary and Exocrine Pancreatic Diseases

SECTION I: Differential Diagnoses for Owner Chief Concerns and Physical Examination Findings

- Vomiting
- Diarrhea
- Weight Loss
- Poor Appetite/No Appetite
- Polyphagia
- Polyuria/Polydipsia
- Lethargy/Stupor/Pacing
- Jaundice
- Dark Feces or Melena
- Abdominal Enlargement
- Cranial Abdominal Pain
- Petechiae and Ecchymoses

SECTION II: Diagnosis of Exocrine Pancreatic Disease

- Nonspecific Laboratory Findings in Pancreatic Disease
- More Specific Laboratory Tests for Exocrine Pancreatic Disease
- Pancreatic Imaging
- Pancreatic Biopsy

SECTION III: Diseases of the Exocrine Pancreas

- Introduction to the Anatomy and Physiology of the Exocrine Pancreas
- Acute Pancreatitis
- Chronic Pancreatitis
- Exocrine Pancreatic Insufficiency
- Neoplasia of the Exocrine Pancreas in Dogs

- Nutrition for Pancreatic Disease
- Analgesia in Acute and Chronic Pancreatitis

SECTION IV: Diagnosis of Hepatobiliary Disease

- Nonspecific Laboratory Tests in Hepatobiliary Disease
- Laboratory Tests More Specific for Hepatobiliary Disease
- Imaging the Liver, Biliary System, and Portal Vasculature
- Liver Biopsy
- Interpretation of Cytological Examination of the Liver
- Interpretation of Liver Biopsy Reports

SECTION V: Diseases of the Liver, Gallbladder, and Biliary Tract

- Introduction to the Liver Anatomy and Physiology
- Acute Toxic Hepatopathy
- Acute Infectious Liver Disease and Hepatic Abscess
- Chronic Hepatitis: Copper-Associated
- Chronic Hepatitis: Idiopathic, Autoimmune, and Other Non-Copper-Associated Causes
- Gallbladder and Biliary Tract Diseases: Mucocoeles and Infections
- Congenital Vascular Diseases
- Other Congenital Liver Diseases: Ductal Plate and Gallbladder Disorders
- Canine Vacuolar Hepatopathies, Hepatocutaneous Syndrome, and Amyloidosis
- Liver Tumors in Dogs
- Nutrition for Acute and Chronic Liver Disease..
