

TABLE OF CONTENTS

Clinical Immunodermatology in Small Animals

1. Basic cutaneous immunology
and immunopathology
Skin immunity
A brief introduction to the immune response
Types of immunological hypersensitivity
Diagnosis of dermatological allergies
Desensitisation immunotherapy
Immunodeficiencies and dermatosis
Immunomodulators in dermatology
2. Introduction to clinical dermatology
Introduction to clinical dermatology
Clinical dermatology terminology
Skin cytology
3. Immune-mediated skin diseases
Atopic dermatitis. Clinical case
Food allergy. Clinical case
Angioedema and urticaria. Clinical case
Flea allergy dermatitis. Clinical case
Arthropod bite hypersensitivity. Clinical case
Eosinophilic granuloma. Clinical case
Contact hypersensitivity. Clinical case
Cutaneous vasculitis. Clinical case
Pemphigus foliaceus. Clinical case
Discoid lupus erythematosus. Clinical case
Dermatomyositis. Clinical case

Uveodermatologic syndrome. Clinical case
Vitiligo. Clinical case
Erythema multiforme and toxic epidermal
necrolysis. Clinical case
Sebaceous adenitis. Clinical case
Lymphocytic folliculitis (alopecia areata
and pseudopelade). Clinical case
Plasma cell or lymphoplasmacytic
pododermatitis. Clinical case
Idiopathic sterile granuloma and pyogranuloma.
Clinical case
Postinflammatory hyperpigmentation/
hypopigmentation. Clinical case
Skin reactions to drugs and vaccines. Clinical case
Panniculitis and cellulitis. Clinical case
Lupoid onychodystrophy. Clinical case

4. Cutaneous neoplasms
of immune origin

Histiocytoma. Clinical case
Canine mastocytoma. Clinical case
Cutaneous lymphoma. Clinical case
Melanoma. Clinical case.
