

TABLE OF CONTENTS

Fundamental Principles of Veterinary Anesthesia

Section 1: Foundational Knowledge

1. Veterinary Anesthesia
2. Patient Assessment, Planning, and Preparation
3. Pain Physiology, Assessment, and Principles of Treatment
4. Principles of Anesthetic Monitoring and Monitoring Equipment
5. Inhalation Anesthetic Delivery Apparatus
6. Introduction to Pharmacology and Pharmacotherapy
7. Injectable Drugs Used for Premedication, Induction, and Maintenance of General Anesthesia
8. Inhalational Anesthetic Drugs
9. Nonsteroidal Anti-inflammatory Drugs, Local Anesthetic Drugs, and Adjunct Drugs Used for Pain Management
10. Other Drugs Used During the Peri-anesthetic Period

Section 2: Fundamental Aspects of Clinical Anesthesia

11. Standards of Practice for Performing Veterinary Anesthesia
12. Approach to Healthy Dog and Cat Anesthesia and Analgesia, and Selected Disease Processes and Procedures
13. Approach to Healthy Horse, Donkey, and Mule Anesthesia and Analgesia
14. Anesthesia and Analgesia of Healthy Exotic Companion Mammals, Ruminants, and Pigs
15. Approach to Neonatal, Pediatric, and Geriatric Patients
16. Approach to a Patient in Shock
17. Approach to a Patient with Cardiac Pathology
18. Approach to a Patient with Respiratory Pathology
19. Approach to a Patient with Renal, Urinary, or Hepatobiliary Disease
20. Anesthetic Complications and Cardiopulmonary Resuscitation

Appendices

- Appendix 1: RECOVER CPR Algorithms
- Appendix 2: RECOVER CPR Emergency Drug Dose Charts
- Appendix 3: Checklists
- Appendix 4: Peri-anesthetic Monitoring Sheets

Index.
