

# TABLE OF CONTENTS

## Infectious Disease Ecology and Conservation

### **PART I Epidemiological Background**

- 1 Conservation Biology and Parasitism
- 2 Disease Epidemiology in Natural Systems
- 3 Anthropogenic Effects and Wildlife Diseases

### **PART II Acquisition of Field Data**

- 4 Sampling, Experimental Design, and Statistical Analysis
- 5 Capture, Restraint, and Euthanasia of Target Species
- 6 Disease and Agent Detection
- 7 The Environmental Context of Wildlife Disease
- 8 Agent and Disease Detection—Laboratory Methods

### **PART III Modeling and Data Analysis**

- 9 Disease Modeling
- 10 Estimating Basic Epidemiological Parameters

.../...

## **PART IV Managing Wildlife Disease**

11 Disease Management: Introduction and Planning

12 Preventing New Disease Occurrences

13 Disease Elimination and Eradication

14 Disease Control: How to Live with Infection

15 Infectious Diseases as Biological Control Agents

16 Ethical and Public Outreach Considerations

## **End Matter**

INDEX.
