

# **TABLE OF CONTENTS**

## **Principles and Practices of Canine and Feline Clinical Parasitic Diseases**

1. General Introduction to Canine and Feline Parasitic Diseases
2. Symbiosis and Parasitism in Dogs and Cats
3. Risk Factors Associated with Parasitic Diseases
4. Host–Parasite–Microbiome Interactions
5. Linguatula serrata Worm Infections
6. Annelida Infestations
7. Insecta Infestations
8. Acanthocephala Worm Infections
9. Tick-borne Diseases
10. Roundworm Infections
11. Tapeworm Infections
12. Fluke Infections
13. Protozoan Infections
14. Immunology and Pathogenic Purview
15. Parasitic Zoonoses and One Health
16. Parasitic Fauna Associated with Reproductive Disorders
17. Diagnostic Perspectives of Parasitic Diseases
18. Anti-helminthic Resistance
19. Molecular Biology of Parasites
20. Parasitic Vaccines
21. Biological Control of Parasites

22. Therapeutic Measures and Control Strategies

23. Future Advanced Research Directions.
