About the authors	vii
Foreword	ix
<i>Edward Cooper</i> – Coordinating author	
1 Introduction: Importance and Role of Fluid Therapy in Small Animal Practice	1
<i>Edward Cooper</i>	
2 Body Fluid Compartments	3
<i>Edward Cooper</i>	
3 Fluid Types – Crystalloids	10
<i>Edward Cooper</i>	
4i–ii Fluid Types: Colloids	
4i Synthetic Colloids	18
<i>Anda Young</i>	
4ii Natural Colloids	26
<i>Julien Guillaumin</i>	
5 Routes of Fluid Administration	33
<i>Edward Cooper</i>	
6i–iii General Approach to Fluid Therapy (Application and Monitoring)	
6i Resuscitation Fluid Therapy	41
<i>Edward Cooper</i>	
6ii Replacement Fluid Therapy	54
<i>Julien Guillaumin</i>	
6iii Maintenance Fluid Therapy	63
<i>Jiwoong Her</i>	
7i–iv Fluid Supplementation	
7i Dextrose Supplementation	68
<i>Edward Cooper</i>	
7ii Potassium Supplementation	73
<i>Page Yaxley</i>	
7iii Calcium and Phosphorus Supplementation	81
<i>Anda Young</i>	

7iv	Magnesium Supplementation <i>Julien Guillaumin</i>	91
8i–ix	Selected Clinical Circumstances and Case Scenarios	
8i	Special Considerations for Patients Experiencing Hemorrhage/Trauma <i>Edward Cooper</i>	95
8ii	Special Considerations for Septic Patients <i>Julien Guillaumin</i>	103
8iii	Impact of Heart Disease on Fluid Therapy <i>Jiwoong Her</i>	107
8iv	Impact of Renal Disease on Fluid Therapy <i>Anda Young</i>	110
8v	Anesthesia/Perioperative Fluid Considerations <i>Jiwoong Her</i>	115
8vi	Management of Hypernatremia and Hyponatremia <i>Julien Guillaumin</i>	119
8vii	Approach to Fluid Therapy in Patients with Hypoproteinemia <i>Julien Guillaumin</i>	123
8viii	Special Considerations in Neonates/Pediatrics <i>Page Yaxley</i>	126
8ix	Special Considerations in Cats <i>Anda Young</i>	133
