

TABLE OF CONTENTS

THE HIP

Introduction

Standard approach to the hip joint

Hip luxation

Closed reduction

Introduction

Indications

Surgical planning

Technique

Postoperative management

Outcome

Complications

Hip toggle

Introduction

Indications

Surgical planning

Surgical technique

Postoperative management

Outcome

Complications

Iliofemoral suture

- Introduction
- Indications
- Surgical planning
- Surgical technique
- Postoperative management
- Outcome
- Complications

Transarticular pin

- Introduction
- Indications
- Surgical planning
- Surgical technique
- Postoperative management
- Outcome
- Complications

Hip dysplasia

Femoral head and neck excision

- Introduction
- Indications
- Surgical planning
- Surgical technique
- Postoperative management
- Outcome
- Complications

Legg–Calvé–Perthes disease

THE STIFLE

Patellar luxation

Introduction

Indications for surgery

Surgical planning

Surgical technique

- Trochlear groove deepening procedures

- Trochlear chondroplasty

- Tibial tuberosity transposition

Postoperative management

Outcome

Complications

Cranial cruciate ligament disease

Introduction

- Cranial cruciate ligament: anatomy and function

- Clinical history, physical examination and diagnosis

- Surgical and nonsurgical management

Extracapsular repair for management of cranial cruciate ligament disease

- Introduction

- Indications

- Surgical planning

- Surgical technique

- Postoperative management

Outcome

Complications

Tibial tuberosity advancement

Introduction

Indications

Surgical planning

Surgical technique

Complications and long-term outcome

Tibial plateau levelling osteotomy

Introduction

Indications

Surgical planning

Surgical technique

Postoperative management

Outcome

Complications

Cranial closing wedge osteotomy

Introduction

Surgical planning

Surgical technique

Postoperative management

Outcome

Complications

Meniscal pathology and treatment

Introduction

Diagnosis of meniscal injuries

Surgical techniques

- Meniscal inspection: medial and lateral arthrotomy
- Medial meniscal release
- Meniscal surgery
- Postoperative management
- Outcome
- Complications

THE TARSUS

- Introduction

Common calcaneal tendon mechanism and injury repair

- Introduction
- Indications for surgery
 - Surgical planning
- Surgical techniques
 - Chronic common calcaneal tendon mechanism injury
 - Acute injuries of the common calcaneal tendon mechanism
- Postoperative management
- Outcome
- Complications

Luxations of the tarsal joint

- Types of luxations
 - Tibiotarsal subluxation and luxation

Intertarsal subluxation and luxation

Tarsometatarsal subluxation and luxation

Surgical management

Malleolar fracture repair

Transarticular external skeletal fixation in the tarsal joint

Partial and pantarsal arthrodesis

REFERENCES
