<u>Preface</u>
Further Reading
<u>Abbreviations</u>
Part I: General Pathological Mechanisms
1 Inflammation
<u>Definition</u>
<u>Trigger</u>
<u>Defence Cascade of the Body</u>
Player of the Inflammation
Course of the Acute Inflammation
References
2 Sepsis and Cytokine Storm
Further Reading
<u> 3 Fibrosis</u>
<u>Definition</u>
Cells of Fibrosis Initiation
Course of the Fibrosis
<u>References</u>
<u> 4 Degeneration</u>
<u>Definition</u>
<u>Aetiology</u>
Cellular Disturbances in Degeneration
<u>Degenerative Tissue Changes</u>
Further Reading
5 Obesity

Definition

Fat Metabolism

Fat Transport

Mechanism of Obesity

Consequences of Obesity

Further Reading

6 Ischaemia, Hypoxia

Importance of Oxygen

The Physiological Way of Oxygen

Definition of Hypoxia, Ischaemia

Acute Hypoxia

Chronic Hypoxia

References

Further Reading

7 Cell Death

Definition

Necroptosis

Autophagy

Pyroptosis

Further Reading

8 Neoplasia

Definition

Causes

Neoplastic Transformation

Metastasis

<u>Pathophysiology</u>

Local Processes

Systemic Processes

Paraneoplastic Syndrome

Tumour Cachexia

References

9 Infections

Virus

Bacteria

Parasites

Further Reading

10 Ageing

Molecular Aspects of Ageing

Cell Ageing and Telomere Length

Cell Ageing and Transcription and Translation

Cell Ageing and Mitochondrial Function

Cell Ageing and the Cytoskeleton

Ageing and Extracellular Matrix

Ageing in the Dog

Ageing in the Cat

Clinical-Pathological Changes in Old Age

References

Further Reading

<u> 11 Pain</u>

Definition

Classification of Pain

<u>Influence of Pain on the Organism</u>

Reference

Further Reading

12 Hypothalamus Function

Functions

The Control Circuits in Detail

References

Further Reading

Part II: General Clinical Manifestations (Alphabetical)

13 Abdominal Enlargement

Definition

Aetiology

Organ Enlargement

Reduced Muscle Tone

Reference

Further Reading

14 Ataxia

Definition

Physiology of Movement Coordination

Aetiology

Pathogenesis

Further Reading

15 Constipation

Definition

Physiological Basics

Aetiology
