Foreword	xv	Golgi apparatus (complexus golgiensis)	13
Translator's note	xvii	Membrane recycling	14
About the companion website	xviii	Organelles of cellular respiration and energy production	14
1 The cell (cellula)	1	Mitochondria	14
H.-G. Liebich		Number and distribution of mitochondria	16
Cell membrane (cytolemma, membrana cellularis)	1	Cell contractility and motility	16
Cell membrane structure	1	Actin filaments (microfilaments)	16
Lipid bilayer	2	Microtubules	17
Membrane proteins	3	Centriole (centriolum)	19
<i>Integral membrane proteins</i>	3	Microtubule-organising centre (MTOC)	19
<i>Peripheral membrane proteins</i>	3	Cilia	20
Membrane polysaccharides	3	Intermediate filaments	20
Plasmalemma	3	<i>Keratins (cytokeratins, tonofilaments)</i>	21
Cellular metabolism	4	<i>Vimentin and vimentin-like proteins</i>	21
Mechanisms of substrate uptake	5	<i>Neurofilaments</i>	21
<i>Membrane transport</i>	5	<i>Lamin A and lamin B</i>	21
<i>Vesicular transport</i>	5	Exogenous and endogenous cellular inclusions	21
Endocytosis	5	Endogenous pigments	22
Pinocytosis	6	Exogenous pigments	22
Receptor-mediated endocytosis	6	Nucleus	22
Phagocytosis	6	Number, size, shape and position	23
Exocytosis	7	Nuclear envelope (nucleolemma)	24
Endosomal system	8	Nucleoplasm (nucleoplasma)	24
Intracellular metabolism	8	<i>Chromatin (chromatinum)</i>	25
<i>Cell matrix (cytosol)</i>	8	Euchromatin (euchromatinum)	25
<i>Lysosomes (lysosoma)</i>	9	Heterochromatin (heterochromatinum)	26
Lysosome structure	9	<i>Nucleolus</i>	26
<i>Peroxisomes (peroxisoma)</i>	10	Cell growth and division	26
<i>Organelles of anabolism</i>	10	Cell cycle	27
Ribosomes (ribosoma)	10	<i>Interphase</i>	27
Ribosome structure	10	<i>Mitotic (M) phase: nuclear division (karyokinesis) and cytoplasmic division (cytokinesis)</i>	28
Endoplasmic reticulum (reticulum endoplasmaticum)	11	Prophase	28
Rough endoplasmic reticulum (reticulum endoplasmaticum granulosum)	11	Metaphase	28
Smooth endoplasmic reticulum (reticulum endoplasmaticum nongranulosum)	12	Anaphase	29
<i>Organelles of protein modification and vesicular trafficking</i>	13	Telophase	29

Cytokinesis	29	Keratinised stratified squamous epithelium (epithelium stratificatum squamosum cornificatum)	46
Endomitosis	30		
Amitosis	30		
Meiosis	30	Transitional epithelium (epithelium transitionale)	47
Meiosis I (reductional division)	30		
Meiosis II (equatorial division)	30	Glandular epithelium (epithelium glandulare)	47
Cell death	30	Endocrine glands (glandulae endocrinae)	50
		Exocrine glands (glandulae exocrinae)	51
Cell surface specialisations	32	Intra-epithelial glands (glandulae intraepitheliales)	51
Apical surface specialisations	32	Extra-epithelial glands (glandulae exoepitheliales)	52
Microvilli	32	Shape of the secretory unit	53
Cilia (kinocilia)	33	Structure of the ducts	53
Stereocilia	34	Mode of secretion	53
Lateral surface specialisations	34	Chemical composition of the secretion	56
Direct contacts	34		
Indirect contacts	34		
Zonula occludens (tight junction)	34		
Zonula adherens and desmosome (macula adherens)	35		
Gap junction (nexus)	36		
Basal surface specialisations	37		
Focal adhesions	37		
Hemidesmosomes	37		
Basement membrane (membrana basalis)	37		
Lamina lucida	37		
Lamina basalis	37		
Lamina fibroreticularis	38		
2 Epithelial tissue (textus epithelialis)	39	3 Connective and supportive tissues	62
H.-G. Liebich		(textus connectivus)	
		H.-G. Liebich	
Histogenesis	41	Structure of connective and supportive tissues	62
Classification	41	Cells	62
Surface epithelium (epithelium superficiale)	41	Resident cells	62
Single-layered epithelium (epithelium simplex)	41	Transient cells	64
Simple squamous epithelium (epithelium simplex squamosum)	41	Intercellular matrix (substantia intercellularis)	65
Simple cuboidal epithelium (epithelium simplex cuboideum)	43	Connective tissue fibres	66
Simple columnar epithelium (epithelium simplex columnare)	43	Collagen fibres (fibra collagenosa)	66
Pseudostratified epithelium (epithelium pseudostratificatum)	44	Reticular fibres (fibra reticularis)	67
Multi-layered (stratified) epithelium (epithelium stratificatum)	44	Elastic fibres (fibra elastica)	68
Stratified cuboidal or columnar epithelium (epithelium stratificatum cuboideum/ columnare)	45	Ground substance	69
Stratified squamous epithelium (epithelium stratificatum squamosum)	45	Types of connective tissue	69
Non-keratinised stratified squamous epithelium (epithelium stratificatum squamosum noncornificatum)	45	Embryonic connective tissue (textus connectivus embryonalis)	69
		Reticular connective tissue (textus connectivus reticularis)	71
		Lymphoreticular connective tissue (textus connectivus lymphoreticularis)	71
		Haemoreticular connective tissue (textus connectivus haemopoeticus)	71
		Adipose tissue (textus adiposus)	71
		Pluri- or multilocular adipose tissue (textus adiposus fuscus)	72
		Unilocular adipose tissue (textus adiposus albus)	72
		Connective tissue proper (textus connectivus collagenosus)	72
		Loose connective tissue (textus connectivus collagenosus laxus)	74
		Dense connective tissue (textus connectivus collagenosus compactus)	74

Dense irregular connective tissue	74	
Dense regular connective tissue	75	
Types of supportive tissue	76	
Cartilage (textus cartilagineus)	76	
<i>Hyaline cartilage (cartilago hyalina)</i>	77	
<i>Elastic cartilage (cartilago elastica)</i>	79	
<i>Fibrocartilage (cartilago fibrosa)</i>	79	
Bone (textus osseus)	80	
<i>Bone cells</i>	81	
Osteoprogenitor cells	81	
Osteoblast (osteoblastus)	81	
Bone-lining cells	82	
Osteocyte (osteocytus)	83	
Osteoclast (osteoclastus)	83	
<i>Bone matrix</i>	84	
Organic component (collagen fibres and ground substance)	84	
Inorganic component (minerals)	84	
<i>Types of bone</i>	85	
Woven bone (os membranaceum reticulofibrosum)	85	
Lamellar bone (os membranaceum lamellosum)	85	
<i>New bone formation (osteogenesis)</i>	87	
Intramembranous ossification	87	
Endochondral ossification	89	
4 Muscle tissue (textus muscularis)	91	
H.-G. Liebich		
Smooth muscle (textus muscularis nonstriatus)	91	
Fine structure of smooth muscle cells (myocytus nonstriatus)	91	
Muscle contraction	94	
Striated muscle (textus muscularis striatus)	94	
Skeletal muscle (textus muscularis striatus skeletalis)	94	
<i>Fine structure of skeletal muscle cells (myocytus striatus skeletalis)</i>	95	
Sarcoplasm	95	
Sarcoplasmic reticulum	95	
Transverse tubular system	95	
<i>Muscle contraction</i>	98	
<i>Fibre types</i>	99	
<i>Satellite cells</i>	99	
<i>Innervation</i>	99	
<i>Connective tissue associated with skeletal muscle</i>	99	
<i>Microvasculature</i>	99	
Cardiac muscle (textus muscularis striatus cardiacus)	99	
<i>Structure of cardiac muscle</i>	99	
Fine structure of cardiac muscle (myocytus striatus cardiacus)	99	
Sarcoplasm	99	
Sarcoplasmic reticulum	101	
<i>Impulse generation and conduction pathways</i>	102	
5 Nervous tissue (textus nervosus)	103	
H.-G. Liebich		
Nerve cells (neuron, neurocytus)	103	
Classification of nerve cells	103	
<i>Unipolar neurons</i>	103	
<i>Bipolar neurons</i>	103	
<i>Pseudo-unipolar neurons</i>	105	
<i>Multipolar neurons</i>	105	
Neuronal structure	106	
<i>Perikaryon</i>	106	
<i>Nerve cell processes</i>	107	
Dendrites	107	
Axons	107	
Energy supply and axonal transport	107	
Synapse	107	
<i>Structure of a chemical synapse</i>	108	
<i>Function of the chemical synapse</i>	109	
<i>Neuromuscular synapse (motor end plate)</i>	109	
Nerve fibre (neurofibra)	109	
<i>Myelinated nerve fibres</i>	111	
Formation of the myelin sheath	111	
Myelination of peripheral nerve fibres	112	
Myelination of central nerve fibres	112	
Composition of the myelin sheath	112	
<i>Unmyelinated nerve fibres</i>	113	
<i>Generation and conduction of nerve stimuli</i>	113	
Nerves	113	
<i>Nervous tissue investments</i>	114	
<i>Regeneration of nervous tissue</i>	114	
Glial cells (neuroglia, gliocytus)	114	
Glial cells of the central nervous system	116	
<i>Ependymal cells (ependymocytus)</i>	116	
<i>Astrocytes (astrocytus)</i>	116	
Protoplasmic astrocytes (astrocytus protoplasmaticus)	116	
Fibrous astrocytes (astrocytus fibrosus)	116	
<i>Oligodendrocytes (oligodendrocytus)</i>	116	
<i>Microglia (Hortega cells)</i>	118	
Glial cells of the peripheral nervous system	118	
<i>Schwann cell (neurolemmocyte)</i>	118	
<i>Satellite cell (amphicyte, gliocytus ganglii)</i>	118	

6 Circulatory system (systema cardiovasculare et lymphovasculare)	119	
H.-G. Liebich		
Cardiovascular system (systema cardiovasculare)	119	
Capillaries (vas capillare)	119	
<i>Continuous capillaries</i>	122	
<i>Fenestrated capillaries</i>	122	
<i>Sinusoidal capillaries (vas capillare sinusoideum)</i>	122	
Blood vessels	122	
<i>Structure</i>	122	
<i>Innervation</i>	125	
<i>Nutritional blood supply</i>	125	
<i>Arteries (arteria)</i>	125	
Elastic arteries (arteria elastotypica)	126	
Muscular arteries (arteria myotypica)	126	
<i>Arterioles (arteriolae)</i>	126	
<i>Veins (vena)</i>	127	
<i>Venules (venula)</i>	129	
<i>Arteriovenous specialisations</i>	129	
Heart (cor)	129	
<i>The conducting system of the heart</i>	130	
Lymph vessels (systema lymphovasculare)	130	
Lymph capillaries (vas lymphocapillare)	131	
Collecting ducts (vas lymphaticum myotypicum)	132	
Lymph heart of birds (cor lymphaticum)	132	
Lymphoreticular formations of birds	133	
7 Blood and haemopoiesis (sanguis et haemocytogenesis)	134	
H.-G. Liebich		
Formation of blood cells (haemopoiesis)	134	
Regulation of blood formation	134	
Bone marrow	135	
Blood cell differentiation	135	
Haemopoietic stem cells	135	
Progenitor cells	135	
<i>Species variation</i>	136	
Red blood cells (erythrocytes)	136	
Development of red blood cells (erythropoiesis)	136	
Erythrocytes	136	
White blood cells (leucocytes)	137	
Granulocytes (granulocytus)	137	
<i>Development of white blood cells (granulopoiesis)</i>	137	
<i>Neutrophils (granulocytus neutrophilicus)</i>	138	
<i>Eosinophils (granulocytus eosinophilicus)</i>	139	
<i>Basophils (granulocytus basophilicus)</i>	140	
Agranulocytes	140	
<i>Lymphocytes</i>	140	
Lymphocyte formation (lymphopoiesis)	140	
Lymphocyte morphology and function	140	
T lymphocytes (T cells)	142	
B lymphocytes	142	
<i>Monocytes</i>	143	
Development of monocytes (monocytopoiesis)	143	
Monocyte morphology and function	143	
Platelets (thrombocytes)	144	
Development of platelets (thrombopoiesis)	144	
Platelet structure and function	145	
Blood clot formation	145	
8 Immune system and lymphatic organs (organa lymphopoetica)	146	
H.-G. Liebich		
Immune system	146	
Principles of adaptive immunity	146	
Cells of the adaptive immune response	147	
<i>T cells</i>	147	
CD4 ⁺ lymphocytes	147	
CD8 ⁺ lymphocytes	147	
<i>B cells</i>	148	
<i>Immune response to antigens</i>	148	
Major histocompatibility complex (MHC)		
proteins	148	
<i>MHC class I proteins</i>	148	
<i>MHC class II proteins</i>	148	
<i>MHC class III proteins</i>	148	
Antigen-presenting cells	148	
<i>Macrophages</i>	148	
<i>Non-follicular dendritic cells</i>	149	
<i>Follicular dendritic cells (FDCs)</i>	149	
<i>B cells</i>	149	
Elimination of antigens	149	
Lymphatic organs (organa lymphopoetica)	149	
Thymus	149	
<i>Cortex</i>	152	
<i>Medulla</i>	152	
Differentiation of T lymphocytes	152	
<i>Thymic involution</i>	152	
Bone marrow	152	
Mucosa-associated lymphatic tissue (MALT)	152	
<i>Lymphoid follicles</i>	152	
<i>Tonsils and Peyer's patches</i>	153	
Lymph nodes (nodi lymphatici)	154	

Vessels and sinuses	156	Enteroendocrine system	177
<i>Species variation</i>	156	Additional endocrine cells	178
Spleen (lien)	157		
Structure of the spleen	157	10 Digestive system	179
Splenic parenchyma and blood vessels	157	(apparatus digestorius)	
Lymphatic organs of birds	159	H.-G. Liebich	
Lymph nodes	159	Oral cavity (cavum oris)	179
Cloacal bursa (bursa cloacalis, bursa Fabricii)	160	Lip (labium)	180
Spleen	160	Cheek (bucca)	182
9 Endocrine system	161	Palate (palatum)	182
(systema endocrinum)		Hard palate (palatum durum)	182
H.-G. Liebich		Soft palate (palatum molle, velum palatinum)	183
Hypothalamo-hypophyseal system	161	<i>Species variation</i>	183
Hypothalamus	162	Tongue (lingua)	184
Hypophysis cerebri (pituitary gland)	163	<i>Species variation</i>	184
Adenohypophysis	163	Lingual papillae	184
Pars distalis	163	Mechanical papillae	185
Chromophobic cells (endocrinocytus chromophobus)	163	Gustatory papillae	185
Chromophilic cells (endocrinocytus chromophilus)	163	Innervation and blood supply of the tongue	187
Pars tuberalis	165	Tooth (dens)	187
Pars intermedia	165	Enamel (enamelum)	187
Neurohypophysis	165	Dentin (dentinum)	188
Pineal gland (epiphysis cerebri)	166	Dental pulp (pulpa coronalis)	189
<i>Species variation</i>	167	Attachment apparatus of the teeth	189
Thyroid gland (glandula thyroidea)	167	Cementum	189
Structure of the thyroid gland	168	Periodontal ligament	189
Follicular cells (endocrinocytus follicularis)	169	Alveolar bone	189
C cells (cellula parafollicularis)	170	Salivary glands (glandulae oris)	189
<i>Species variation</i>	170	Salivary gland structure	189
Parathyroid gland (glandula parathyroidea)	170	Parotid salivary gland	191
Adrenal gland (glandula suprarenalis)	171	Mandibular salivary gland	192
<i>Species variation</i>	171	Sublingual salivary glands	192
Adrenal cortex (cortex glandulae suprarenalis)	172	<i>Species variation</i>	192
Zona arcuata/glomerulosa	172	Pharynx	193
Zona fasciculata	173	Tubular digestive organs	193
Zona reticularis	174	Structure of tubular digestive organs	193
Adrenal medulla (medulla glandulae suprarenalis)	174	Tunica mucosa	194
Innervation	174	Tela submucosa	194
Paraganglia	175	Tunica muscularis	195
Pancreatic islets (islets of Langerhans, insulae pancreaticae)	176	Tunica adventitia	195
		Tunica serosa	195
		Oesophagus	195
		<i>Species variation</i>	197
		Stomach (gaster, ventriculus)	198
		Glandular stomach (pars glandularis)	199
		Cardiac glands	201
		Proper gastric (fundic) glands	201
		Isthmus	201
		Neck	203
		Body and fundus	203

Pyloric glands (glandulae pyloricae)	206	Wall of sinusoid	229
Gastric mucus	206	Kupffer cells (macrophagocyti stellati)	229
Gastric juice	206	Perisinusoidal space (spatium perisinusoideum)	229
Regulation of gastric juice production	206	Ito cells	230
Ruminant forestomach	206	<i>Hepatocyte (hepatocytus)</i>	230
Reticulum	209	<i>Bile ducts</i>	234
Rumen	209	<i>Species variation</i>	234
Omasum	210	Gall bladder (vesica biliaris, vesica fellea)	235
Omaso-abomasal junction	210	Pancreas	236
Avian stomach	210	<i>Species variation</i>	238
Glandular stomach (proventriculus, pars glandularis)	211		
Muscular stomach (ventriculus, pars muscularis)	211		
Small intestine (intestinum tenue)	213	11 Respiratory system (apparatus respiratorius)	239
<i>Tunica mucosa</i>	214	H.-G. Liebich and G. Zengerling	
Mucosal epithelium (epithelium mucosae)	216	<i>Conducting airways</i>	239
Enterocytes	218	Structure of the conducting airways	239
Goblet cells	218	Segments of the conducting airways	239
Endocrine cells	219	Nasal cavity (cavum nasi)	241
Paneth cells	219	<i>Nasal vestibule</i>	241
Lamina propria mucosae	219	<i>Species variation</i>	241
<i>Species variation</i>	220	<i>Respiratory region</i>	241
Lamina muscularis mucosae	220	<i>Olfactory region</i>	242
Innate and adaptive protective mechanisms of the intestinal mucosa	220	<i>Species variation</i>	243
<i>Tela submucosa</i>	220	Paranasal sinuses (sinus paranasales)	244
<i>Tunica muscularis and tunica serosa</i>	220	Vomeroneasal organ (organum vomeronasale)	244
<i>Distinguishing features of segments of the small intestine</i>	220	Pharynx	244
Duodenum	220	Larynx	244
Jejunum	221	<i>Epiglottis</i>	245
Ileum	221	<i>Species variation</i>	245
Large intestine (intestinum crassum)	221	Trachea	246
<i>Tunica mucosa</i>	221	<i>Species variation</i>	247
<i>Tela submucosa</i>	221	<i>Species variation</i>	248
<i>Tunica muscularis</i>	221	Lung (pulmo)	248
<i>Distinguishing features of segments of the large intestine</i>	223	<i>Bronchi</i>	248
Caecum	223	<i>Bronchioles (bronchioli veri, bronchioli terminales)</i>	250
Colon	223	<i>Species variation</i>	252
Rectum	223	<i>Gas exchange interface</i>	252
Anal canal (canalis analis)	223	Respiratory bronchioles	252
Avian intestine	224	Alveolar ducts and alveolar sacs	252
Cloaca	225	Alveoli (alveoli pulmonis)	252
Glands associated with the intestine	226	<i>Blood–air barrier</i>	255
Liver (hepar)	226	Bronchial system and gas exchange in birds	255
<i>Structure of the liver</i>	226	<i>Air sacs (sacci pneumatici, sacci aerophori)</i>	257
Vessels of the liver	226		
Liver lobule (lobulus hepaticus)	227		
Liver sinusoid (vas sinusoidum)	229		

12 Urinary system (organa urinaria)	258	Bladder (vesica urinaria)	274
H.-G. Liebich and J. Maierl		<i>Species variation</i>	275
Kidney (ren)	258	Urethra	275
Macroscopic structure of the kidney	258	<i>Female urethra</i>	275
<i>Species variation</i>	258	<i>Species variation</i>	275
Vascular supply and innervation	260	<i>Male urethra</i>	275
<i>Blood vessels</i>	260	<i>Species variation</i>	275
<i>Species variation</i>	262		
<i>Lymph vessels</i>	262	13 Male reproductive system	276
<i>Nerves</i>	262	(organa genitalia masculina)	
Microscopic structure of the nephron and		H.-G. Liebich	
collecting duct system	262	Testis	276
<i>Species variation</i>	263	Stroma	276
Renal corpuscle (corpusculum renale) and		<i>Interstitial cells (Leydig cells)</i>	277
ultrafiltration	263	<i>Species variation</i>	277
<i>Species variation</i>	263	Parenchyma	277
<i>Species variation</i>	264	<i>Convoluted seminiferous tubules</i>	
<i>Capillary tuft (glomerulus)</i>	264	<i>(tubuli seminiferi convoluti)</i>	277
Endothelial cells	265	Spermatogenic cells (cellulae	
Basement membrane (membrana		spermatogenicae)	277
<i>Bowman's capsule</i>	265	Spermatogenesis	280
Visceral layer (podocytes, podocyti)	265	Spermatocytogenesis	280
Parietal layer and urinary space		Spermiogenesis	280
(lumen capsulae)	265	Cyclic events of spermatogenesis	283
<i>Mesangium</i>	267	Sustentacular cells (Sertoli cells,	
<i>Glomerular filtration apparatus</i>		epitheliocyti sustentantes)	284
(blood–urine barrier)	267	Functions of sustentacular cells	285
Tubules of the nephron	267	<i>Straight testicular tubules</i>	
<i>Species variation</i>	268	<i>(tubuli seminiferi recti)</i>	286
<i>Proximal convoluted tubule</i>	268	<i>Rete testis</i>	286
<i>Species variation</i>	269	<i>Ductuli efferentes testis</i>	286
<i>Proximal straight tubule</i>	270	Testis of birds	287
<i>Species variation</i>	270	Epididymis	288
<i>Thin limb of loop of Henle</i>	271	Epididymal duct (ductus epididymidis)	288
<i>Species variation</i>	272	<i>Species variation</i>	290
<i>Distal straight tubule and distal</i>		<i>Pampiniform plexus</i>	290
<i>convoluted tubule</i>	272	Epididymis of birds	290
Collecting duct system	272	Ductus deferens	290
Juxtaglomerular apparatus (complexus		<i>Species variation</i>	292
juxtaglomerularis)	272	Ductus deferens of birds	292
<i>Macula densa</i>	272	Accessory glands (glandulae genitales	292
<i>Juxtaglomerular cells</i>	272	<i>accessoriae)</i>	
<i>Extraglomerular mesangial cells</i>	273	Pars glandularis of the ductus deferens	292
<i>Interstitium</i>	273	Vesicular glands (glandula vesicularis)	292
Urinary passages	273	<i>Species variation</i>	294
Renal pelvis (pelvis renalis)	273	Prostate gland (glandula prostatica)	294
<i>Species variation</i>	273	<i>Species variation</i>	295
<i>Species variation</i>	273	Bulbourethral gland	
Ureter	273	(glandula bulbourethralis)	296
<i>Species variation</i>	273	<i>Species variation</i>	296
<i>Species variation</i>	273		
<i>Species variation</i>	273		

Urethra	296	Vulva	319
Penis	297	<i>Species variation</i>	<i>319</i>
<i>Species variation</i>	<i>298</i>	<i>Species variation</i>	<i>319</i>
Prepuce (praeputium)	299	Oestrous cycle	319
<i>Species variation</i>	<i>299</i>	Cyclic changes in the ovary	320
Penis of birds	300	Hormonal effects on the uterine tubes	320
<i>Accessory structures of the phallus</i>	<i>300</i>	Cyclic changes in the uterus	320
14 Female reproductive system (organa genitalia feminina)	301	Oviduct of birds	321
H.-G. Liebich and S. Kölle		Structure	321
Ovary (ovar, ovarium)	301	<i>Infundibulum</i>	<i>322</i>
Structure of the ovary	302	<i>Magnum</i>	<i>322</i>
<i>Species variation</i>	<i>302</i>	<i>Isthmus</i>	<i>323</i>
Cortex (cortex ovarii, zona parenchymatosa) 302		<i>Uterus</i>	<i>323</i>
Ovarian follicle 302		<i>Vagina</i>	<i>323</i>
Primordial and primary follicles 302		15 Common integument (integumentum commune)	324
Secondary follicles 303		H.-G. Liebich, S. Reese and K.-D. Budras	
<i>Species variation</i>	<i>305</i>	Structure of the skin	324
Tertiary follicles 306		Skin as a protective organ	325
Mature follicles 307		Epidermis	325
Follicular atresia 308		Dermis (corium)	328
Ovulation 308		<i>Papillary layer (stratum papillare)</i>	<i>328</i>
Corpus luteum 309		<i>Reticular layer (stratum reticulare)</i>	<i>328</i>
Formation of the corpus luteum 309		Hypodermis (subcutis)	330
<i>Species variation</i>	<i>309</i>	Skin glands (glandulae cutis)	331
Regression of the corpus luteum 311		<i>Sweat glands (glandulae sudoriferi)</i>	<i>331</i>
<i>Medulla (medulla ovarii, zona vasculosa)</i>	<i>311</i>	<i>Sebaceous glands (glandulae sebaceae)</i>	<i>332</i>
<i>Species variation</i>	<i>311</i>	Pigmentation	332
<i>Ovary of birds</i>	<i>311</i>	Skin as an organ of thermoregulation	332
<i>Oogenesis</i>	<i>312</i>	Vessels of the skin	332
Uterine tube (tuba uterina)	312	Hair (pili) and hair follicles	333
Structure of the uterine tube	313	<i>Hair structure</i>	<i>333</i>
<i>Tunica mucosa</i>	<i>314</i>	<i>Root sheath structure</i>	<i>334</i>
<i>Tunica muscularis</i>	<i>314</i>	Epithelial root sheath 334	
<i>Tela subserosa and tunica serosa</i>	<i>314</i>	Dermal root sheath 335	
Uterus	314	<i>Types of hair</i>	<i>335</i>
Structure of the uterus	315	Sinus hair (pilus tactilis) 335	
<i>Endometrium</i>	<i>315</i>	<i>Species variation</i>	<i>335</i>
<i>Species variation</i>	<i>316</i>	Skin as a sensory organ	335
<i>Myometrium</i>	<i>316</i>	Skin as an immunological barrier	335
<i>Perimetrium</i>	<i>317</i>	Skin modifications	336
Cervix (cervix uteri)	317	Mammary gland (udder, mamma, glandula mammaria)	336
<i>Species variation</i>	<i>318</i>	<i>Structure of lactating mammary gland</i>	<i>337</i>
Vagina	318	Alveoli (acini) 337	
Structure of the vagina	318	Ducts (ductus lactiferi) 338	
<i>Tunica mucosa</i>	<i>318</i>	Lactiferous sinus (sinus lactifer) 338	
<i>Species variation</i>	<i>318</i>	Interstitialium of the lactating mammary gland 338	
<i>Tunica muscularis</i>	<i>318</i>		
<i>Tunica serosa and tunica adventitia</i>	<i>318</i>		

<i>Structure of the quiescent mammary gland</i>	338		
<i>Hormonal regulation of the mammary gland</i>	339		
<i>Structure of the teat (papilla mammae)</i>	339		
Digital organs and horn	340		
<i>Equine hoof (ungula)</i>	340		
<i>Ruminant and swine hoof (ungula)</i>	342		
<i>Claw (unguicula)</i>	342		
<i>Horn</i>	343		
Skin of birds	343		
Featherless body regions	344		
<i>Skin glands</i>	345		
Feathered body regions	345		
<i>Feathers</i>	345		
Feather structure	345		
16 Receptors and sense organs (organa sensuum)	347		
H.-G. Liebich			
Exteroreceptors	347		
Free nerve endings	347		
Simple receptors	347		
Lamellar receptors	349		
Proprioceptors	349		
Golgi tendon organ	349		
Muscle spindle	349		
Enteroreceptors	349		
Gustatory organs (organa gustus)	349		
Taste buds	349		
Olfactory organs (organa olfactus)	351		
Eye (organum visus)	353		
Bulb (bulbus oculi)	353		
<i>Structure</i>	353		
<i>Fibrous tunic (tunica fibrosa or externa bulbi)</i>	353		
Sclera	354		
Cornea	354		
<i>Species variation</i>	354		
<i>Species variation</i>	354		
<i>Vascular tunic (uvea, tunica vasculosa or media bulbi)</i>	355		
Choroid (choroidea)	355		
<i>Species variation</i>	355		
Ciliary body (corpus ciliare)	355		
<i>Species variation</i>	356		
Iris	356		
<i>Species variation</i>	357		
Innervation of the iris and ciliary body	358		
<i>Neural tunic (retina, tunica interna bulbi)</i>	358		
Retinal pigment epithelium (stratum pigmentosum retinae)	360		
Neurosensory retina (stratum nervosum retinae)	361		
Nutritional support of the retina	364		
Neurosensory retina of birds	365		
Optic nerve (nervus opticus)	367		
<i>Species variation</i>	368		
<i>Internal structures of the bulb</i>	368		
Lens	368		
<i>Species variation</i>	369		
Vitreous body (corpus vitreum)	369		
<i>Species variation</i>	369		
Anterior and posterior chambers	370		
<i>Species variation</i>	370		
Accessory organs of the eye	370		
<i>Eyelids (palpebrae)</i>	370		
Upper and lower eyelids (palpebra superior et inferior)	370		
<i>Species variation</i>	370		
Tarsal plate (tarsus)	371		
<i>Species variation</i>	371		
Third eyelid (nictitating membrane, palpebra tertia)	371		
<i>Species variation</i>	372		
<i>Lacrimal apparatus (apparatus lacrimalis)</i>	372		
<i>Species variation</i>	372		
Ear (organum vestibulocochleare)	372		
External ear (auris externa)	373		
<i>Pinna (auricle, auricula)</i>	373		
<i>External acoustic meatus (meatus acusticus externus)</i>	373		
<i>Tympanic membrane (membrana tympani)</i>	373		
<i>Species variation</i>	373		
Middle ear (auris media)	374		
<i>Species variation</i>	374		
Internal ear (auris interna)	375		
<i>Vestibular apparatus (pars statica labyrinthi, labyrinthus vestibularis)</i>	375		
Sacculus and utriculus	375		
Semicircular ducts (ductus semicirculares)	376		
<i>Auditory apparatus (pars auditiva labyrinthi, labyrinthus cochlearis)</i>	376		
Cochlear duct (ductus cochlearis)	377		
Spiral organ (organum spirale, organ of Corti)	378		
<i>Species variation</i>	379		

17 Nervous system (systema nervosum)	381		
H.-G. Liebich			
Divisions of the nervous system	381		
Central nervous system (pars centralis, systema nervosum centrale)	381		
Spinal cord (medulla spinalis)	382		
<i>Grey matter (substantia grisea)</i>	382		
<i>White matter (substantia alba)</i>	384		
Cerebellum	385		
<i>Molecular layer</i>	385		
<i>Purkinje cell layer</i>	385		
<i>Granule cell layer</i>	385		
Cerebrum	386		
<i>Cerebral cortex (cortex cerebri)</i>	386		
		<i>Cerebral white matter (corpus medullare cerebri)</i>	388
		Peripheral nervous system (pars peripherica, systema nervosum periphericum)	388
		Sensory ganglia	388
		Autonomic ganglia	389
		Meninges	389
		Pachymeninx (dura mater)	389
		Leptomeninges	389
		Ventricles (ventriculi)	389
