Clinical Reasoning and Differential Diagnosis: Evaluate your Skills

1. How to perform differential diagnosis

What is clinical reasoning?

Steps of problem-based clinical reasoning

2. Clinical reasoning in a case of fever/hyperthermia

CLINICAL CASE: Fever/hyperthermia

Reasoning applied to the case

Final treatment plan and evolution

Brief review of...

Urinary tract infections

3. Clinical reasoning in a case of polyuria/polydipsia

CLINICAL CASE: Polyuria/polydipsia

Reasoning applied to the case

Final treatment plan and evolution

Brief review of...

Central diabetes insipidus (CDI)

4. Clinical reasoning in the case of urinary disorder

CLINICAL CASE: Urinary disorder

Reasoning applied to the case

Final treatment plan and evolution

Brief review of...

Ectopic ureter

5. Clinical reasoning in a case of regurgitation/dysphagia

CLINICAL CASE: Regurgitation/dysphagia

Reasoning applied to the case

Final treatment plan and evolution

Brief review of...

Cricopharyngeal dysphagia

6. Clinical reasoning in a case of diarrhoea

CLINICAL CASE: Diarrhoea

Reasoning applied to the case

Final treatment plan and evolution

Brief review of...

Feline inflammatory bowel disease

7. Clinical reasoning in a case of jaundice

CLINICAL CASE: Jaundice

Reasoning applied to the case

Final treatment plan and evolution

Brief review of...

Canine hepatic lymphoma

8. Clinical reasoning in a case of respiratory distress

CLINICAL CASE: Respiratory distress

Reasoning applied to the case

Final treatment plan and evolution

Brief review of...

Pulmonary parasitosis in cats.
